Complete the notes below.

Write **ONE WORD ONLY** for each answer.

The White-lipped Grove Snail

Background

- This is an air-breathing land snail.
- It has a distinctive shell pattern, with a large variation in colour.
- Its main diet is dead or decaying **31**
- To obtain necessary minerals, it also eats **32**
- It is found only in Ireland and the Pyrenees mountains, and nowhere in between.

University of Nottingham study

- Via the internet, volunteers were recruited for the **33** of snails.
- Researchers analysed the snails' genetic material.

Findings and theories

- The snails in both locations were the same variety, which occurs nowhere else.
- Fossils show the snails' arrival in Ireland was quite recent.
- 'Convergent evolution' is very unlikely.
- Natural migration is ruled out as these snails do not like **34**
- In the Pyrenees, large piles of shells have been found in **35**
- This indicates the snails were used as **36**
- There is archaeological evidence of **37** between the two areas.
- The conclusion is that snails were most likely carried in **38**

Further work

- A wider **39** of the snails is required for the study.
- One other organism will be investigated: a particular type of **40**
